PERI QuickSolve
## The planning tool to simplify your project

PERI QuickSolve solutions exist for formwork, scaffolding, and even bridge construction projects.

One powerful tool for your project

PERI QuickSolve allows you to plan simple structures with wall formwork, slab formwork, scaffolding, and even bridges. Planning is really easy, quick and intuitive. After entering basic variables such as the general layout of your project, wall height, or wall thickness, the application creates 2D and 3D plans that are easy-to-read. The plans can also be adapted spontaneously in the course your project if situations arise that require changes in planning.

Planning made easy. The user-friendly interface lets you plan your project quick and reliably.

Your project – your solution

You can consider or not your own inventory of material, before QuickSolve puts together a detailed parts list for material allocation. You can plan your project based on a specific product of your choice. Optionally, PERI QuickSolve provides a detailed cycle overview that lets you create balanced cycles to optimally use the material required for your project. What's more, the use of PERI QuickSolve is free of charge, after a short registration, you can use the PERI QuickSolve planners wherever you want, whenever you want. You are always in control of the planning of your project.

PERI QuickSolve lets you adjust your project to the material available on your project site.

One registration away from simplifying your project

All you need is a computer or tablet with an internet connection, because PERI QuickSolve is a browser-based tool, which does not require any additional installation. After registration, the complete functionality is at your disposal. PERI QuickSolve has proven to be a very useful tool for many of PERI's customers, who helped with their feedback to make the application even more powerful. Based on the requirements and feedback of our users, PERI will continuously improve the application and add additional features. Feedback can be sent directly to the development team via the application itself.

Start to QuickSolve your project:
PERI QuickSolve planning modules are powerful and effective tools enabling you to work faster and thus to be more efficient on your project. With PERI QuickSolve, you have a useful tool at your disposal that makes your life easier.

PERI QuickSolve helps you to simplify your project:
- It is easy to use, planning is very intuitive
- It takes into account your needs and the material of your choice
- It is free of charge and can be used wherever you need it
